TITLE : DISPLAY DEVICE FOR VEHICLE

ABSTRACT : PROBLEM TO BE SOLVED: To provide a display device for a vehicle to ensure excellent visibility even when a visible distance between a display screen and a driver or a passenger is changed.

SOLUTION: The display device for the vehicle 1, which is loaded in a vehicle and displays various information regarding the vehicle on the display screen 6, is characterized by being equipped with a visible distance detection part 8 which detects the visible distance between the driver and the display screen 6 and being able to change the size of characters displayed on the display screen 6 in accordance with the visible distance detected by the visible distance detection part 8.
